

IMPACT MIRACLE Vibration Control End Mill

VF-2MV VF-4MV

Prevention of vibration with irregular helix flutes.

- High rigidity cross-section flute and anti-vibration features offers superior chipping resistance.
- Use of Impact Miracle coating with superior heat resistance allows excellent performance when machining hardened materials.

IMPACT MIRACLE END MILL

VF-2MV

2 flutes, Medium cut length, Irregular helix flutes

0 - -0.020

4 ≤ D4 ≤ 6 0 - -0.008

Carbon Steel, Alloy Steel, Cast Iron (<30HRC)	Tool Steel, Pre-Hardened Steel, Hardened Steel (≤45HRC)	Hardened Steel (≤55HRC)	Hardened Steel (>55HRC)	Austenitic Stainless Steel	Titanium Alloy Heat Resistant Alloy	Copper Alloy	Aluminum Alloy

D: Dia.

- 1) The irregular helix flute end mill has a larger effect on controlling vibration when compared to standard end mills. However, if the rigidity of the machine or the workpiece installation is very low, then vibration can occur. In this case, please reduce the revolution and feed rate proportionately, or set a lower depth of cut.
- 2) When slotting, reduce the revolutions by 20 - 50% and the feed rate by 40 - 60%.
- 3) For austenitic stainless steels, titanium and heat-resistant alloys, the VF-MHV is recommended.

- 3) For austenitic stainless steels, titanium and heat-resistant alloys, the VF-MHV is recommended.

Cutting Performance

- Excellent anti-vibration effects allows stable machining in a wider application area compared to a conventional 2 flute end mill.

End mill	VF2MVD0200 (ø2)
Workpiece	JIS SKD61 (52HRC)
Feed rate	50-200m/min (0.02mm/tooth)
Machining method	Down cut , Air blow

- The VF-4MV delivers excellent vibration resistance when machining hardened steel.

Machining of pocket shaped corners with right angle tool paths

End mill	VF4MVD1000 (ø10)
Workpiece	JIS SKD61 (52HRC)
Revolution	2500min ⁻¹ (188m/min)
Feed rate	600mm/min (0.06mm/tooth)
Machining method	Down cut , Air blow

For Your Safety

●Don't handle inserts and chips without gloves. ●Please machine within the recommended application range and exchange expired tools with new ones in advance of breakage. ●Please use safety covers and wear safety glasses. ●When using compounded cutting oils, please take fire precautions. ●When using rotating tools, please make a trial run to check run-out, vibration and abnormal sounds etc.
