CBN-2XLRB

2 flute CBN long neck radius end mill

CBN end mill series, the ultimate choice for finish machining of moulds.

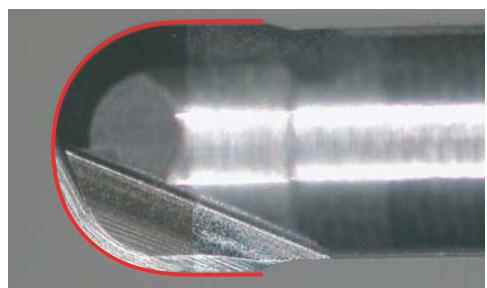

The realisation of excellent performance when milling hardened steel over 65HRC.

High precision geometry with good fracture resistance

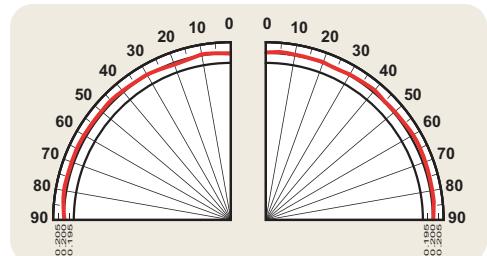

- CBN material with good fracture resistance enables the machining of 70HRC hardened steel.
- 2 variations, long neck ball nose and long neck radius types available.

Long neck ball nose type

- Cutting edge geometry that offers excellent chip disposal enables long, stable operations.
 - Excellent performance over a wide array of machining applications due to the precision, seamless cutting edge geometry.
- Radius tolerance $\pm 5\mu\text{m}$, diameter tolerance $0\sim 10\mu\text{m}$.

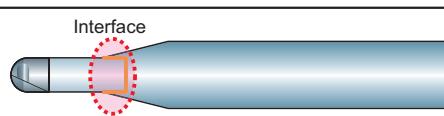

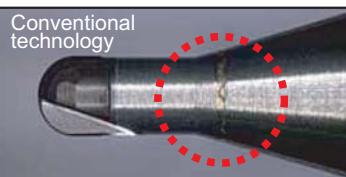

■ Inspection Report CBN-2XLRB ø2 x 0.2R

Long neck radius type

- Capable of a large pick feed for high efficiency finishing of flat faces.
- High precision design with radius tolerance of $\pm 5\mu\text{m}$

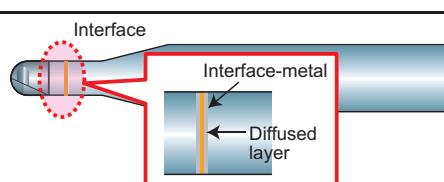

An original manufacturing method allows a wide variety of neck lengths

(Inserted braze method)

The neck is inserted into the shank and brazed.
→ Low bonding strength

It's impossible to increase the neck length.

Possible to increase the neck length.

[Diffusion Bonding] (PAT.P)

Newly developed joining method.
→ Bonding strength is the same as the carbide material.

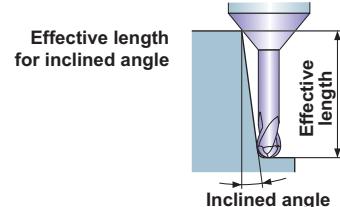

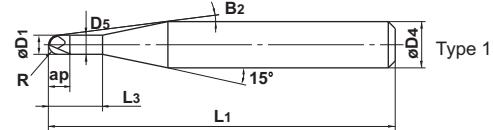

* Example: R1 neck length of 5mm extended to 20mm.

For Your Safety

●Don't handle inserts and chips without gloves. ●Please machine within the recommended application range and exchange expired tools with new ones in advance of breakage. ●Please use safety covers and wear safety glasses. ●When using compounded cutting oils, please take fire precautions. ●When using rotating tools, please make a trial run to check run-out, vibration and abnormal sounds etc.
